

Siegfried Actives

Standard Products

**Preferred partner**

Siegfried Actives holds a premium position as a global supplier of controlled substances and generic APIs (active pharmaceutical ingredients).

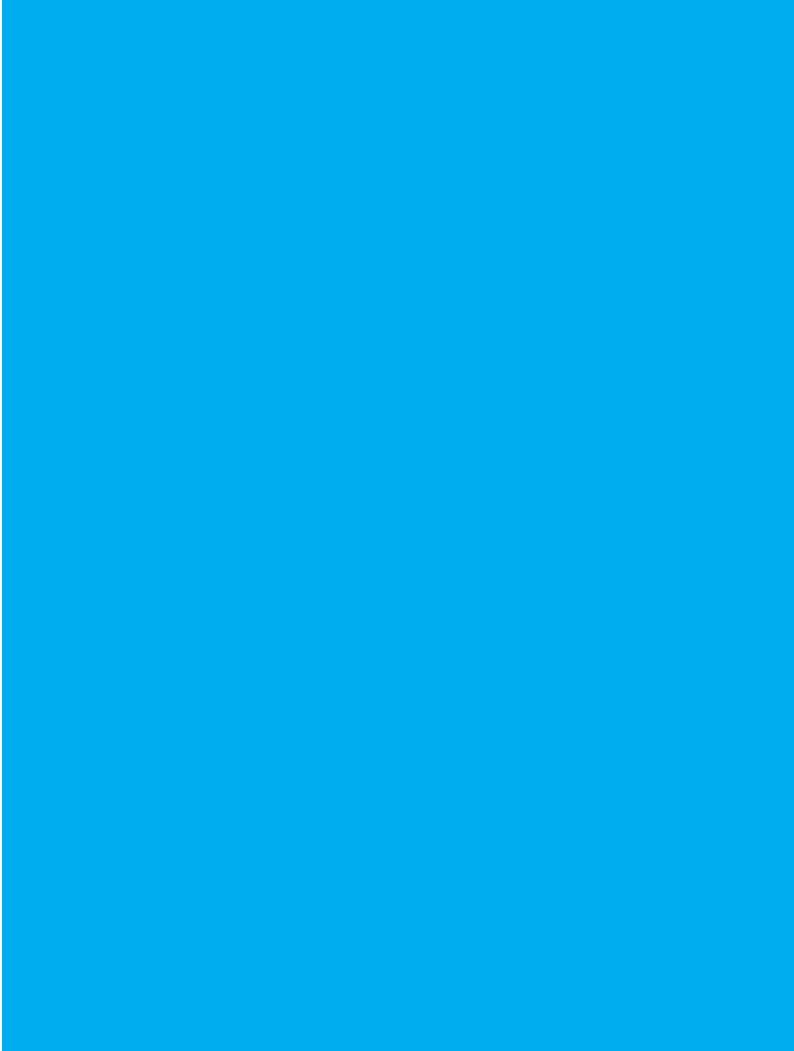

Siegfried maintains chemical production facilities in Zofingen, Switzerland, and Pennsville, New Jersey, U.S.A. with capacity to grow with our customers. Both sites are FDA-inspected and operate in compliance with cGMP (current Good Manufacturing Practices).

**Our commitment**

Siegfried Actives is dedicated to providing quality products and maintaining state-of-the-art facilities. Our continued commitment to comply with the principles of cGMP and to satisfy our customers' requirements is driving continuous process optimization and upgrades of our facilities and equipment.

We specialize in controlled substances and generic APIs which are used in niche indication areas and specific markets.

Your preferred partner world-wide for pharmaceutical products and services.

### **Our product range**

Siegfried Actives is focused on controlled substances and generic APIs for the merchant market. Our strategy is to strengthen our position in the controlled substance market and to complement our portfolio with the range of opiates and opioid derivatives.

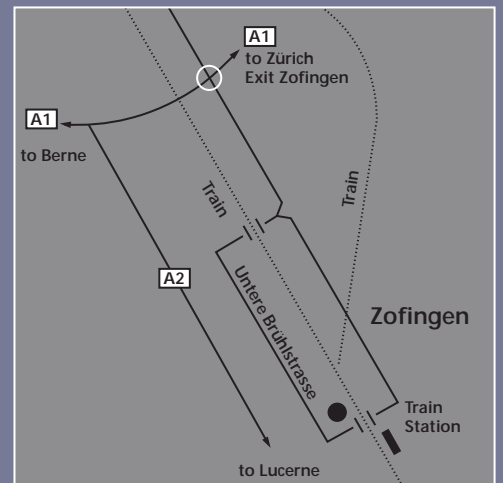

We offer fully documented generic APIs to the merchant market conforming to the highest quality standards and produced with utmost respect for the environment. Our regulatory product documentation (USD MF, EDMF, CEP) is continuously updated to assure that our customers applications remain active during the whole product life cycle.

### **Reliable supply of quality products**

Siegfried Actives has extensive production and storage capacity to allow an annual output exceeding 1,500 metric tons of high-quality products. Our plants are designed for multipurpose, full-scale chemical production of APIs and key intermediates. We produce controlled substances at both of our manufacturing locations.

Being close to our customers, we work on a rolling forecast (ROFO) basis in order to steer our electronic production planning system. Our modern warehouse IT system ensuring ample safety stocks supports reliable on-time delivery.
