Selecting the right outsourcing partner is critical in a competitive market environment. This ideal partner needs industrial experience, coupled with reliability and flexibility. Beyond expertise, customers need a partner with a wide technological range and sufficient production capacity to reduce the complexity of a project, especially when deadlines are tight.

As an experienced, international outsourcing partner, Siegfried provides products and customized services that integrate seamlessly into our customers' value chain. Siegfried offers a wide-range of services for the pharmaceuticals industry: development services for active pharmaceutical ingredients and finished drug products, registration work, production, packaging and shipping. As a former, fully-

integrated pharmaceutical company, Siegfried is one of the few exclusive suppliers worldwide that has extensive skills in both API manufacturing and in the production of finished drug products. This is a rare combination of experience and know-how in an integrated supplier of development and production services.

With Siegfried as your preferred partner, you can expect real added value for your business. Whether your needs are in custom development and manufacturing of APIs or drug products, control substances, high potency products or manufacturing of demanding formulations, Siegfried delivers more benefits than you expect.

Dr. Rudolf Hanko, Siegfried CEO

Siegfried maintains development production sites in Switzerland, Malta and the USA. Our company employs approximately 700 people, with sales of approximately CHF 314 million in 2010. Siegfried Holding AG is listed on the Swiss stock exchange in Zurich (SIX: SFZN).

Siegfried is continuing to develop its technical facilities as well as its global geographic presence. Currently we are expanding in Asia. Our technological competence is fully compliant with all standard regulations in work

processes and production, across the globe. We observe the strictest regulations and quality guidelines in development, production and marketing.

## Integrated service along the value chain

Bringing together our long-standing pharma and chemical heritage, we offer as an integrated partner benefit to our customers with more synergy, expertise and value.

Explore more about how our broad range of custom development services, drug substance & drug product manufacturing capabilities, together with our existing product portfolio may help you achieve greater value.

For the customer, this means:

- Reduced complexity in the supply chain and direct communication

- Clear interfaces to suppliers with little external and in-house time required
- Reduced technology transfer costs
- Project management that leverages synergies between departments, and ensures smooth and timely workflows
- Optimal performance of formulation, thanks to combined and coordinated access to analytics and production
- Comprehensive life cycle management from development to commercialization and generic drugs

# Active Pharmaceutical Ingredients and Intermediates

Siegfried is the optimal partner for cGMP and non-cGMP intermediates and finished APIs.

**Our strengths translate into your benefit:**

- Smooth technology transfer and efficient project management
- Integrated process development from kick-off to optimum result
- cGMP / non-cGMP manufacturing
- Proven know-how in all physical operations
- Completely integrated support (DMF and CEP)

- Analytical services (monitoring, stability studies, purity analysis)
- Comprehensive customer service and technical support

We make sure there are no bottlenecks and that your products reach the market on time.

# Optimum Safety Standards

Safety and environmental awareness are top priorities at Siegfried.

Safety and environmental awareness is a mindset at Siegfried that is engrained in all of our activities and processes. We promote a company culture with zero tolerance for accidents. We continuously monitor our operations for optimal safety and environmental standards.

Our corporate philosophy is anchored in safety and environmental protection. With this

vision, Siegfried has implemented its worldwide safety and environmental policy, SHE (Safety, Health Environment). Every day we strive to minimize our impact on the environment and keep our work environment safe and healthy – and it shows in our track record.

Expect higher environmental and safety standards from Siegfried.

## Controlled Substances

Siegfried has a product range of controlled substances and other active pharmaceutical ingredients, including painkillers and opiates.

As a leading supplier, Siegfried has a wide-range of products such as opiates, barbiturates and substances containing nicotine, with new products added continually.

Procurement for Europe and the USA is organized through a central purchasing department. This guarantees quality, reliability and procurement security. Siegfried procures raw materials from tried-and-tested partners with

whom we've had a lasting and reliable relationship.

As a recognized expert for controlled substances, Siegfried has the required licenses and approvals from public authorities for importing, exporting and distributing large quantities of these substances. With Siegfried, you can expect not only optimal quality but also regulatory and technical support.

## Finished Drug Products

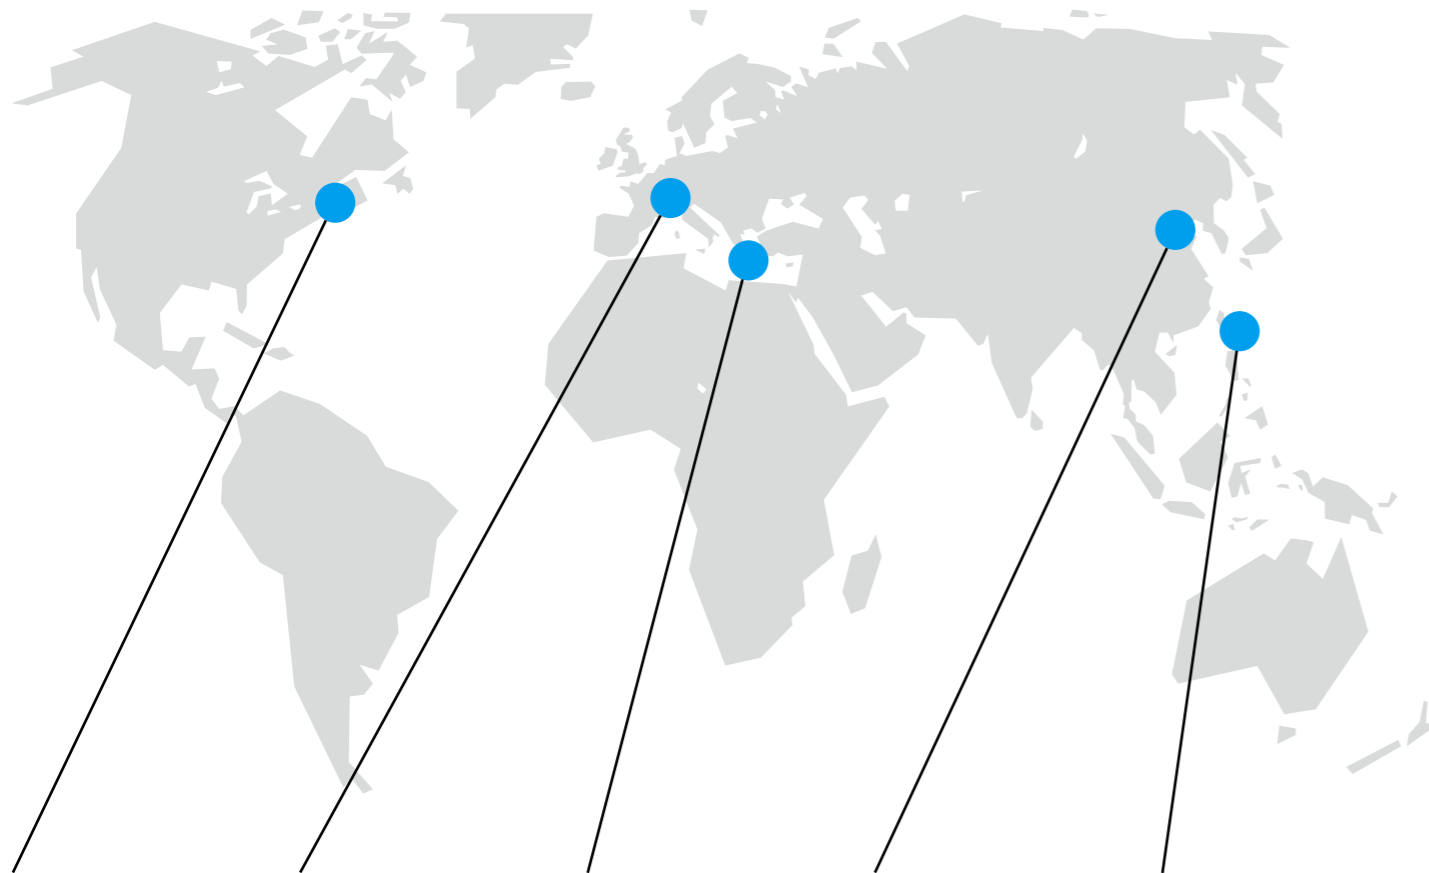

Siegfried offers a broad base of know-how in complex oral drug delivery systems with in-house development available for licensing, custom development and manufacturing, as well as finished products.

### Expect more from:

- Sophisticated solid oral dosage formulation development expertise
- Innovative process optimization & improvement
- Expertise in a variety of different technologies
- Creative life-cycle management approaches
- cGMP formulation scale-up, clinical trial manufacturing & production throughout the whole product lifecycle
- Dedicated project management offering transparency, flexibility & proactive relationship
- Proactive product co-development with selected partners
- Outstanding quality and regulatory compliance
